

LISTRA-Safety Light

Avoiding accidents using LISTRA-Leuchte Safety Light

- Having LISTRA-Safety-Light fitted to your FLT-forklift you automatically avoid accidents between pedestrians and FLT-forklifts.
- When the FLT moves a light-beam is being bundled to a spot shown on the ground four meters ahead. This spot warns pedestrians at crossings and exits etc. that a FLT is approaching.
- This LISTRA-Safety-Light equipped with two strong certified LED-lights is approved. It consists of a sealed metal-housing and can be fitted to any FLT.

Technical Data

Voltage	multi-voltage 12-96 Volts DC
Power	2x 3 Watt
Amps	0,52 Amp @ 12 Volts DC
Technology	2 CREE high-performance, 1300 Lumen
Light intensity	12000 Candela
Life expectancy	ca. 50.000 hours
IP protection	IP 67 (Full protection for dirt and water resistant)
Mounting	M12
Connector / Cable	Connector (250 Serie) and Housing, Cable 35 cm
Operating temp.	-30° ~ +85°C
Country of origin	EU
Certification
